

Premier jenkinsfile

integration gitlab with jenkins :

create project in gitlab

create ssh keygen:

git config --global user.name "Wissem Sghaier"

git config --global user.email "wissemsghaier2000@gmail.com"

ssh-keygen -t ed25519 -C "wissemsghaier2000@gmail.com"

cd /root/.ssh

ssh-ed25519

AAAAC3NzaC1lZDI1NTE5AAAIKog6R0OgJRFzRXqkBD8HI8n1SSL/LXytwRDS6VeACMK
wissemsghaier2000@gmail.com

Configurer votre Dépôt Git Local

cd existing_folder

git init --initial-branch=main

git remote add origin git@gitlab.com:wissemsghaier2000/gestion_users.git

ou

git remote set-url origin git@gitlab.com:wissemsghaier2000/gestion_users.git

git add .

git commit -m "Initial commit"

git push --set-upstream origin main
