## Send notification to slack from the Jenkins CI Job and Jenkinsfile

## Installation of Slack Notification Plugin:

In your Jenkins dashboard, click on Manage Jenkins from the left navigation.

Navigate to **Manage Plugins** 

Click on the tab name as **Available** 

Search for Slack Notification

create channel in slack:

create new channel: jenkins-alerts-pfe-2023

## Jenkins CI App installation in Slack:

Go to slack app and search for **Jenkins CI** 

Click on the Add to Slack button

Now select the channel (jenkins-alerts-pfe-2023 ) and click on the **Add Jenkins CI Integration** 

Copy the **Token** from the **Jenkins CI** Page and Click on the **Save Setting** button at the bottom

## Slack notification plugin configuration in Jenkins:

Add credentiel in jenkins: jenkins-slack

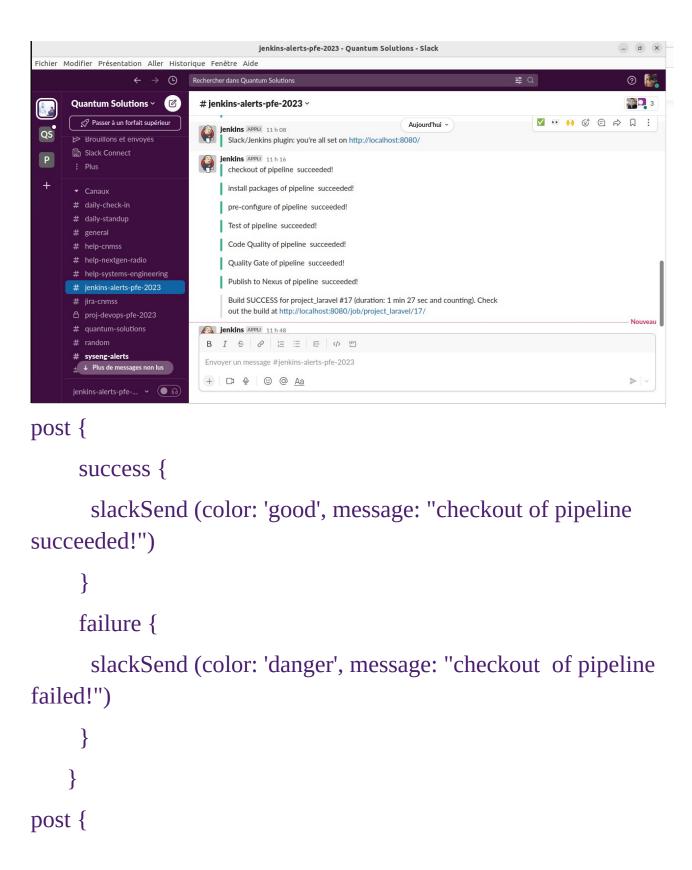

Click on Manage Jenkins again in the left navigation and then click to Configure system.

Find the Slack section and add the following values

Workspace: quantum solutions-corp

Credential: jenkins-slack

Click on the Test connection button to test the notification in the slack channel. Below is the sample notification

```
success {
    slackSend channel: '#jenkins-alerts-pfe-2023', message:
"Build ${currentBuild.result} for ${env.JOB_NAME} #$
{env.BUILD_NUMBER} (duration: $
{currentBuild.durationString}). Check out the build at $
{env.BUILD_URL}"
   }
  failure {
    slackSend channel: '#jenkins-alerts-pfe-2023', message:
"Build ${currentBuild.result} for ${env.JOB_NAME} #$
{env.BUILD_NUMBER} (duration: $
{currentBuild.durationString}). Check out the build at $
{env.BUILD_URL}"
  }
 }
stage ("started "){
    steps {
     slackSend channel: "#jenkins-alerts-pfe-2023", message: "
STARTED:job '${env.JOB_NAME} ${env.BUILD_NUMBER}'
(${env.BUILD_URL})"
    }
   }
```
